Intro

Go ahead, play around with the editor! Be sure to check out **bold** and *italic* styling, or even links. You can type the Markdown syntax, use the toolbar, or use shortcuts like `cmd-b` or `ctrl-b`. As mentioned in [1]

Lists

Unordered lists can be started using the toolbar or by typing `*`, `-`, or `+`. Ordered lists can be started by typing `1..`

Unordered

- Lists are a piece of cake
- They even auto continue as you type
- A double enter will end them
- Tabs and shift-tabs work too

Ordered

1. Numbered lists...
2. ...work too!

Some sentence that needs citation [2]
