/today

Intro

Go ahead, play around with the editor! Be sure to check out **bold** and *italic* styling, or even links. You can type the Markdown syntax, use the toolbar, or use shortcuts like `cmd-b` or `ctrl-b`. As mentioned in [@lorena2019complex]

Lists

Unordered lists can be started using the toolbar or by typing `*`, `-`, or `+`. Ordered lists can be started by typing `1.`.

Unordered

- Lists are a piece of cake
- They even auto continue as you type
- A double enter will end them
- Tabs and shift-tabs work too

Ordered

1. Numbered lists. . .
2. . . . work too!

Some sentence that needs citation [@barbon2020evaluating]

What about images?

Math

When $a \neq 0$, there are two solutions to $(ax^2 + bx + c = 0)$ and they are

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Figure 1: UNIMI

The Cauchy-Schwarz Inequality

$$\left(\sum_{k=1}^{n} a_k b_k\right)^2 \leq \left(\sum_{k=1}^{n} a_k^2\right)\left(\sum_{k=1}^{n} b_k^2\right)$$
